TD SYNNEX

Storage Essentials

A Click-to-Run™ Solution from TD SYNNEX

Business Challenge

Every modern business needs the ability to access, share, and store data securely in a flexible cost-efficient way. Most companies have employees working and collaborating from a variety of locations, therefore implementing a proactive data management plan should be a high priority. Many of these businesses are also faced with a variety of challenges such as data supply outpacing local storage, the burden of managing local file servers, and concerns with things like natural disasters, fires, and power outages.

Introducing TD SYNNEX Storage Essentials on Azure

Help your clients implement a scalable storage and archiving solution that centralizes data in Azure Files, while keeping the flexibility, performance, and compatibility of a Windows file server.

TD SYNNEX's Storage Essentials Click-to-Run™ solution automatically provisions Azure Files, Azure File Sync, and Archiving with the ability to customize. This solution will allow you to store any document, images, videos, audios, backups archiving directly into the Cloud as an extension, expansion, and enhancement of an on-premises set up. The File Sync replicates files from your on-premises Windows Server to an Azure file share, enabling you to centralize your file services in Azure while maintaining local access to your data. This ensures durable, highly available secure cloud storage, with file shares in the cloud that are easily accessible.

Key Features

- **Sync multiple branch offices:** Replicate between multiple Windows Server endpoints, eliminating the need of additional and multiple backups and disaster recovery plans.

- **Powerful Restoration:** Two different deployment options are available so you can decide which one better fits the business demands and use case. You can also tailor your SLA needs.

- **Long term storage & protection**: Optimized for securely storing massive amounts of unstructured data, with built in back up and disaster recovery.

Business Outcomes

- Reduced Latency
- Lower Costs and Complexity
- Simplify IT Management
- Increased Productivity, speeding teamwork
- Maintain compliance

Why Leverage TD SYNNEX Click-to-Run™ Solutions?

Reduce Cost and Time
Reduce costs, time and risks by customizing and deploying pre-architected, validated and tested solutions.

Offer More – Get More
Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

Faster Time to Market
Receive a broad set of enablement resources to quickly build cloud solutions practices within your organization.
